OBJECTIVE

To secure a position as a Software Engineer in the Southeastern United States.

EDUCATION

Georgia Institute of Technology

August 2010-December 2015

B.S., Computer Science

Concentrations in Systems & Architecture and People

3 Semesters on the Dean's List

SKILLS

- **Languages and Proficiencies**
 - Workplace experience: C# .NET, SQL
 - Academic experience: Java, C, MATLAB, some Assembly, some Ruby, some Android
- **Coursework**
 - Data Structures & Algorithms, Mobile & Ubiquitous Computing, Computer Organization & Programming, Design & Analysis of Algorithms, Objects and Design, User Interface Design, Design Capstone Project, Systems and Networks

WORK EXPERIENCE

- **Software Engineering Intern – CareerBuilder** August 2014-June 2015
 - Worked on a team of 4 to 6 engineers on a product called Talent Network.
 - Learned C# .NET and SQL in order to contribute to the product overall.
 - Participated in modified SCRUM development practices.
 - Originally a single semester internship, extended twice.
- **Part Time Jobs**
 - Positions with Target and Publix
 - On and off from 2007 to 2012, mostly during summers
 - Used cash registers with both touch screen and keyboard interfaces

PREVIOUS PROJECTS

- **Archive Transition Tool**
 - Worked with the Georgia Tech Library in a group to develop a tool to assist in a transition to a new archive system.
 - Learned Ruby on the fly in order to write code to interface with code written concurrently by group members.
 - Produced documentation so the Library can continue development beyond the semester.
- **Android Phone Development**
 - Worked on an android application in a group and helped build a task manager application
 - Served as the task-master for the group
 - Completed all segments of the project on schedule
