Summary

I am a recent graduate from Eastern Washington University where I obtained my Bachelor's degree in Operations Management and my Minor in Decision Science (also known as business statistics). I received a cumulative 3.3 GPA during my college career which was split between Columbia Basin College and Eastern. But at Eastern alone during my major courses I received a 3.5 GPA. As an intern for Department of Energy at the Hanford Site, I specialized in administrative support to busy offices and the Hanford Patrol with a commitment to delivering high quality results with little supervision. I am a dedicated and focused individual who excels at prioritizing, completing multiple tasks simultaneously and following through to achieve project goals. I am seeking a role of increased responsibility and authority. In my 3 years of internship, I have received merits in efficiency and safety; have learned managerial skills as well as office and administrative skills. Since high school, I have been involved in a non-profit organization called Younglife, where I acted as a mentor. In this experience I have developed public speaking skills as well as leadership. With this, I have also developed great people skills and interpersonal communication skills.

Experience

Intern

September 2012 to September 2015

Mission Support Alliance – DOE – Richland, WA

In this internship I supported work for MSA in Safeguards and Security with the day-to-day implementation of a contractor safety and health program, with a primary emphasis on industrial hygiene. I performed Thermal Stress/Heat Stress Monitoring for the Hanford Patrol Training Academy and at the Volpentest Hazardous Materials Management and Emergency Response (HAMMER) Training Facility.

I worked on completing a complex chemical management inventory that provided documentation of the inventories of chemicals that supported emergency planning and community right-to-know requirements. Also, in this time I received training in Heat Stress, Hearing Conservation, Beryllium Clean Up, and received Government Driver Training.

Dish Room Worker

January 2015 to June 2015

Eastern Washington University, Cheney WA

This was a short term job while attending Eastern. My main responsibilities were to make sure the dish machines were running and in working condition as well as making sure that work flow was consistent and didn't get backed up.

Field Work Supervisor
May 2011 to July 2011

Cherry Ridge Farms, Kennewick WA

This was a seasonal job opportunity where I acted as a supervisor for the workers who picked the cherries and also operated a scanning system that counted how many buckets were filled, which resulted in the worker's pay. In this position, I performed quality control to make sure the product was good and the workers were performing to a satisfying level.

Highlights

Microsoft Office proficiency
Excel spreadsheets
Results-oriented
Self-directed
Time Management
SAS proficient – Statistical Analysis Software

Professional and mature
Resourceful
Dedicated team player
Strong interpersonal skills
Self starter

Accomplishments

In the spring of 2015 I graduated from Eastern Washington University with a major in Operations Management and a minor in Statistics.

Summer 2013 I received my AA degree from Columbia Basin College.

I was hired into the DOE Intern program after several interviews and a very competitive pool of applicants. After gaining 90 credits at Columbia Basin College, I was granted a pay increase and promoted to higher responsibilities in the workplace.

Education

Bachelor's Degree: Operations Management

Minor Degree: Decision Science (Statistics)

Eastern Washington University – Cheney WA, USA

While completing my Bachelorette degree from Eastern, I received a cumulative GPA of 3.5

Associate of Arts: Business Management/Administration, 2013
