-----Objective

To prepare for a future in psychiatric studies, while completing a Post-Baccalaureate Program in Pre-Medical Studies and developing work experience. To be an active participant in a work environment that will provide challenges and new learning experiences. To provide help and support for others in need.

Education

The Pennsylvania State University University Park, PA
Bachelor of Science, Psychology (Neuroscience Option)
Graduation May 5, 2012

Cleveland State University Cleveland, OH
Pre-Medical Post Baccalaureate Program
Date of completion: May 2014

Experience

Montgomery County Day Camp Germantown, MD **May-Aug: 2008,2009**
Camp Counselor

- Supervised and assisted in organization of team building activities that allowed youth (ages 5-16) from under-served areas of Gaithersburg and Germantown, MD to develop their teamwork, social, and problem-solving skills by working together in sports and craft activities daily.
- Provided a safe, caring, and supportive environment for youth (ages 5-16) in which they were able to express themselves through sports, arts, and creative writing.

Washington Middle School For Girls Washington, DC **October 2008-January 2010**

- Mentored and Tutored middle school girls (ages 10-14) from under-served neighborhoods in the Washington DC area in Math, English, and Science at the *Washington Middle School for Girls* who are at risk of leaving school prematurely. Assisted in their adolescent development by providing a safe environment in which they could express themselves, and develop their social skills.

Kennedy Krieger Institute/ JHH Baltimore, MD **June 2012-Aug 2012**
Un-Paid Clinical Research Trainee/Intern (Pediatric Neurogenetics Dept.)

- Collection of literature based research for the purposes of data comparison.
- Analysis of echocardiograms of patients (ages 2-26).
- Data Compilation of Barth syndrome/Microcephaly patient information.
- Assisted with patient contact for clinical and research purposes.
- Observation and participation in patient rounds.
- Attending medical research based lectures/conferences (i.e. Managing Cancer Risk in PTEN-positive patients lecture at Johns Hopkins University).

Presentations

Department of Psychology: Senior Seminar Prospectus State College, PA

The Effects of Parenting on Emotional Development: Does Parenting Play a Mediating Role Between Culture and Emotional Expression?

- Discussed and hypothesized that recent findings in research may provide evidence supporting a relationship between parenting and emotional development in children, and may provide explanation for differences in emotional expressivity among children of different cultures.

Volunteer

October 2008-January 2010

- Distributed sandwiches to the homeless for *McKenna's Wagon: Martha's Table* in Washington, DC.

Skills/Abilities
