OBJECTIVE:

To obtain a position in the Computer/Digital forensic that will utilize my educational skills and challenge me while giving unrelenting support to Information Technology for the engineering development, manufacture and maintenance of a company's products and interest.

EDUCATION:

Bloomsburg University of Pennsylvania
Bachelor of Science in Digital Forensics
Expected Graduation Date: December 2014

RELATED COURSEWORK:

Digital Forensic Software - An extension of Digital Forensics File Systems I and II emphasizing basic and intermediate forensic methodology, including reporting, used on a variety of file systems (FAT, NTFS, HFS, ext2 and ext3) using windows tools and techniques.

Advanced Topic in Digital Forensics - A continuation of Forensic Analysis in a Windows Environment emphasizing advanced forensic methodology, including reporting, on a variety of file systems (FAT, NTFS, HFS, ext2 and ext3) using windows tools and techniques and court testimony.

Intro Computer Network - A hands-on introduction to concepts and issues of computer networks. Course introduces theoretical issues of general computer networks along with installation and configuration of a simple local area network. Computer and network hardware and software are surveyed.

Data Mining - Understand the concepts and issues involved in data mining and learn how to apply current software for tree-structured data analysis to real-world problems.

EXPERIENCE:

Information Technology Intern, Saberpoint, Pompton Plains, NJ   May 2013-June 2013
   - Disassembled parts of the computer
   - Reassembled parts of computer back together
   - Formatted hard disks
   - Assisted IT Manager with organizing computer parts and detecting if they were damaged

File Clerk, Mahwah Valley Orthopedic, Mahwah, NJ   June 2009- September 2009
   - Maintained the accuracy and alphabetical ordering of over 2,000 patient files in a busy medical practice
   - Retrieved and updated patience data as requested by office staff
   - Collaborated with doctors in assisting them with any paperwork that needed to be filled out
   - Rearranged files and organized them in an effective way for the office

SKILLS:

Computer Forensics tools (HxD)
File Allocation Table
Parsing the Partition Table
Data Recovery
Excel, Word, Powerpoint
Software AccessData and EnCase

ACTIVITIES:

Member, Digital Forensic Club (Password Cracking)
Volunteer, Salvation Army Family Store
Volunteer, Fardale Trinity Church as a counselor
Member, Disciple Maker Fellowship
